## PRESS RELEASE

August 8, 2018

Although disappointed in the most recent reports of lead in the water at some locations within our schools the Tensas Parish School Board is determined to work with the LDH to resolve these issues and ensure good quality water is available to our students, staff, and school visitors. In response to the recent report we have begun an aggressive flushing campaign of all water outlets at both schools and have positioned bottled water for use by all stakeholders. Our experienced cafeteria staff members have protocols in place to safely prepare meals from other water sources and will be able to provide safe meals to our students and staff. Unfortunately, we have had these issues for quite some time and our students and staff are accustomed to working around these water issues. We will keep our bottled water and line flushing campaign in place until our water is deemed to be healthy by the LDH.
