SUMMARY OF OFFENSES AND PROBABLE CAUSE AFFIDAVIT:

On Wednesday March 20, 2013 at 2:47am a car was reported to be stopped on Magnolia Drive just north of Apalachee Parkway. The vehicle, a tan 2004 Nissan 4-door, was pointed north in the southbound lanes of Magnolia Dr. The driver's door was open and the victim was partially out. The victim was pronounced deceased at the scene. He had suffered apparent gunshot wounds while inside the car. Projectile holes were evident in the windshield and driver's side window.

At 2:49am the same date, a report of gunshots were received from the Motel 6 at 1027 Apalachee Parkway. These two locations are in close proximity to one another. Security video from Motel 6 confirmed these locations were from the same incident. The victim and Nissan car are seen on video in the west side parking lot of Motel 6. Evidence of a vehicle collision was found in the parking lot which consisted of broken tail light lenses. Also recovered from the parking lot where the victim's car was parked was a .45 caliber spent casing.

The video captures images of the victim and a female subject walking into the breezeway from the parking lot. The victim parked adjacent to the stairwell. The victim is then seen walking back to his car by himself. Less than a minute later a 4-door sedan comes into view and stops behind the victim's vehicle. Seconds later the victim's car reverses from its parked position and collides with the rear of the sedan, essentially pushing the sedan from behind with the rear of the victim's Nissan. A suspect is visible standing at the driver's door of the victim's car. It appears he is either holding onto the Nissan or is attached, as the suspect moves with the Nissan. The suspect then separates from the Nissan as the victim drives south toward the rear of the property. The driver of the sedan pulls forward after the cars separate then applies the brakes. The suspect then enters the front passenger door of the sedan. The sedan has damage to the right rear tail light as it is noticeable when the brakes are applied by the suspect driver. The sedan heads north toward the front of the motel property and exits onto the service road.

Another camera at the rear of the property captures the victim's Nissan driving through the south fence of Motel 6 and then eastbound on Lafayette St. Apparently the victim drove to Magnolia Drive, then northbound to Apalachee Parkway where he succumbed to his injuries.

The tail light lenses recovered from the scene indicated the suspect vehicle was a Chevy Malibu. Patrol officers were advised of the suspect vehicle and as a result a vehicle matching that description with the same damage was located on 03/21/13 on

Mission Rd. The vehicle's owner was contacted on scene. She provided the names of the persons who left in her car Monday morning, March 18th. They were identified as Quanterius Dennis and LaCharles Hudson. She states she is pregnant with Hudson's child. The car was returned with the new damage sometime Wednesday morning, March 20th. The owner was not given an explanation for the damage.

During the processing of the Nissan victim vehicle a latent print was developed on the upper left side of the exterior driver's door handle. This latent print matches the standard of Dennis' left thumb and is consistent with someone using their left hand to open the door. In addition, suspected blood was discovered on the passenger door armrest in the suspect vehicle.

The investigation has revealed that Hudson and Dennis are both associates of the female seen at the hotel with the victim. Analysis of cell phone records indicates that female had contact with Hudson approximately four hours prior to the homicide and immediately thereafter. The records indicate the handset associated with Hudson's cell phone number was communicating with cell sites consistent with servicing the area of the incident around the time of the homicide.

In summary, the victim drove a female to a hotel. When the victim went back to his vehicle, a suspect approached the victim and subsequently shot him twice through the windows of the Nissan car. In his attempt to flee, the victim rammed the suspect vehicle that had blocked him in causing damage to both vehicles. The suspect that was seen standing at the driver's door appears to either get struck by the vehicle or is somehow caught on the vehicle during the collision. The suspect vehicle was operated by a second suspect that stayed in the car. The debris left on scene matched that of a Chevy Malibu. The following morning, a Malibu with matching damage consistent to the collision was located on Mission Rd. The owner of the car had loaned the vehicle, without damage, to Hudson and Dennis. A thumbprint belonging to Dennis was located adjacent to the driver's door handle of the victim's vehicle. Cell phone records indicate Hudson's cell phone communicated with towers consistent with the incident location at the time of the incident.

The preceding is true to the best of my present knowledge or belief.
