PRODUCT OVERVIEW

Wipe those monthly subscription payments away with this HDTV antenna that maximizes your local broadcast TV experience with the use of UHF and VHF frequencies. Having a pre-assembled design, makes the installation process a simplistic breeze. Detecting signals for over 40 miles way and supporting high quality picture and sound up to 1080i HDTV broadcast standards. Mountable outdoors as well as in the attic, where it will receive a sustainable reception even during difficult weather conditions. With the use of multi-element design. it only adds a stronger reception to provide additional content.

Features

- Superior construction to withstand tough outdoor conditions
- Cross phase multi element design

CUSTOMER REVIEWS

Repair out of box

★★★★★ by Kj , on 2016-Dec-30

I had to make a repair on the antenna and take the rivet that holds the dipole into place out because it was loose and put a screw bolt and nut to get it tight. You need to make a better design on this antenna. Now it's on there tight.

TOP 5 REASONS TO GET AN ANTENNA

Don't let other providers fool you, the best possible uncompressed HD signal is delivered with an RCA antenna. You shouldn't settle for a lesser picture when you know your TV is capable of delivering much more.
