

STATE OF MICHIGAN  
OFFICE OF THE GOVERNOR  
LANSING

GRETCHEN WHITMER  
GOVERNOR

GARLIN GILCHRIST II  
LT. GOVERNOR

## EXECUTIVE ORDER

No. 2020-60

### **Temporary safety measures for food-selling establishments and pharmacies and temporary relief from requirements applicable to the renewal of licenses for the food-service industry**

The novel coronavirus (COVID-19) is a respiratory disease that can result in serious illness or death. It is caused by a new strain of coronavirus not previously identified in humans and easily spread from person to person. There is currently no approved vaccine or antiviral treatment for this disease.

On March 10, 2020, the Department of Health and Human Services identified the first two presumptive-positive cases of COVID-19 in Michigan. On that same day, I issued Executive Order 2020-4. This order declared a state of emergency across the state of Michigan under section 1 of article 5 of the Michigan Constitution of 1963, the Emergency Management Act, 1976 PA 390, as amended, MCL 30.401 et seq., and the Emergency Powers of the Governor Act of 1945, 1945 PA 302, as amended, MCL 10.31 et seq.

In the three weeks that followed, the virus spread across Michigan, bringing deaths in the hundreds, confirmed cases in the thousands, and deep disruption to this state's economy, homes, and educational, civic, social, and religious institutions. On April 1, 2020, in response to the widespread and severe health, economic, and social harms posed by the COVID-19 pandemic, I issued Executive Order 2020-33. This order expanded on Executive Order 2020-4 and declared both a state of emergency and a state of disaster across the state of Michigan under section 1 of article 5 of the Michigan Constitution of 1963, the Emergency Management Act, and the Emergency Powers of the Governor Act of 1945.

The Emergency Management Act vests the governor with broad powers and duties to “cop[e] with dangers to this state or the people of this state presented by a disaster or emergency,” which the governor may implement through “executive orders, proclamations, and directives having the force and effect of law.” MCL 30.403(1)-(2). Similarly, the Emergency Powers of the Governor Act of 1945 provides that, after declaring a state of emergency, “the governor may promulgate reasonable orders, rules, and regulations as he or she considers necessary to protect life and property or to bring the emergency situation within the affected area under control.” MCL 10.31(1).

The COVID-19 pandemic has created the risk of COVID-19 exposure in food-selling establishments and pharmacies. Given the need to protect employees and the public from exposure to COVID-19, it is necessary and reasonable to impose standards for food-selling establishments and pharmacies to reduce the risk of COVID-19 exposure and disease transmission. In addition, the COVID-19 pandemic has placed an immediate and unprecedented strain on Michigan's food service industries, local health departments, and the Michigan Department of Agriculture and Rural Development (MDARD). Given the additional workload of local health departments and MDARD due to the COVID-19 pandemic, and given these agencies' statutorily defined role in the renewal of licenses for the food service industry, it is also necessary and reasonable to provide limited and temporary relief from certain licensing requirements and regulations.

Acting under the Michigan Constitution of 1963 and Michigan law, I order the following:

1. Any individual who enters a food-selling establishment or pharmacy who is able to medically tolerate a face covering must wear a covering over his or her nose and mouth, such as a homemade mask, scarf, bandana, or handkerchief.
2. Grocery stores and pharmacies must create at least two hours per week of dedicated shopping time for vulnerable populations, which for purposes of this order are people over 60, pregnant people, and those with chronic conditions, including heart disease, diabetes, and lung disease.
3. Food-selling establishments and pharmacies must deploy strategies to reduce COVID-19 exposure for their customers and employees, including but not limited to the strategies described in sections 11 and 12 of Executive Order 2020-59 or any order that follows from it, as well as the following:
  - (a) Provide access to handwashing facilities, including those available in public restrooms;
  - (b) Require checkout employees to wear coverings over their noses and mouths, such as homemade masks, scarves, bandanas, or handkerchiefs;
  - (c) Allow employees sufficient break time to wash hands as needed;
  - (d) Use best efforts to ensure checkout employees to disinfect their hands between orders to prevent cross-contamination;
  - (e) Use best efforts to provide employees and customers access to an alcohol-based hand sanitizer that contains at least 60% alcohol, as recommended by the Centers for Disease Control and Prevention (CDC);
  - (f) Use best efforts to provide disinfecting wipes at cash registers and entrance points for customers to disinfect carts and baskets, as well as at other appropriate locations;
  - (g) Ensure that both employees and customers remain at least six feet apart to the maximum extent possible, including during employee breaks, for example

by reviewing floor plans, creating temporary barriers, designating aisles as one-way only, and demarcating queueing distances;

- (h) Close self-serve prepared food stations such as salad bars;
- (i) Eliminate free samples and tasting stations;
- (j) Adopt procedures to meet the environmental cleaning guidelines set by the CDC, including by cleaning and disinfecting frequent touchpoints throughout the day such as point of sale terminals at registers, shopping carts, and shopping baskets;
- (k) Prohibit employees who are sick from reporting to work and send employees home if they display symptoms of COVID-19. Employees who test positive for COVID-19 or who display one or more of the principal symptoms of COVID-19 should follow the procedures of Executive Order 2020-36 or any order that follows from it;
- (l) Accommodate employees who fall within a vulnerable population by providing lower-exposure work assignments or giving them the option to take an unpaid leave of absence with a return date coinciding with the end of the declared states of emergency and disaster, or May 21, 2020, whichever is later. Nothing in this executive order abrogates any right to disability benefits. Employees who take an unpaid leave of absence as described in this subsection are encouraged to apply for unemployment benefits;
- (m) Close to the public for sufficient time each night to allow stores to be properly sanitized;
- (n) Encourage cash transactions to be processed at self-checkout kiosks when possible; and
- (o) Develop and implement a daily screening program, as described herein, for all staff upon or just prior to reporting to work sites.
  - (1) The screening procedures must include the following questions:
    - (A) Do you have any of the following symptoms?
      - (i) Fever of 100.4 degrees or higher (as measured by a touchless thermometer if available, but a verbal confirmation of lack of fever is sufficient if a touchless thermometer is not available);
      - (ii) Cough (excluding chronic cough due to a known medical reason other than COVID-19);
      - (iii) Shortness of breath;

- (iv) Sore throat; or
  - (v) Diarrhea (excluding diarrhea due to a known medical reason other than COVID-19).
- (B) Have you travelled internationally or outside of Michigan in the last 14 days, excluding commuting from a home location outside of Michigan? For purposes of this order, commuting is defined as traveling between one's home and work on a regular basis.
- (C) Have you had any close contact in the last 14 days with someone with a diagnosis of COVID-19?
- (2) Any affirmative response to screening questions (1)(A) or (B) above requires the individual to be excluded:
- (A) For at least 72 hours with no fever (three full days of no fever without use of medicine that reduces fever) and other symptoms have improved (for example, when cough and shortness of breath have improved) and at least seven days have passed since symptoms first appeared.
  - (B) Except for necessary workers engaged in travel related to supply chain and critical infrastructure, for 14 days following travel unless that travel was due to commuting from a home location outside of Michigan.
- (3) An employee who provides an affirmative response to screening question (1)(C) may be allowed to continue work at the employer's discretion provided they remain asymptomatic and the employer implements the following additional precautions to protect the employee and the community:
- (A) Employers should measure the employee's temperature and assess symptoms each day before they start work. Ideally, temperature checks should happen before the individual enters the facility. A touchless thermometer, or a dedicated thermometer for the employee if not touchless, should be used. Sharing of any thermometer other than a touchless thermometer is strictly prohibited.
  - (B) As long as the employee does not have a fever or other symptoms, they should self-monitor under the supervision of their employer's occupational health program or other programs in place to protect employee health and safety.
  - (C) If the employee begins to experience symptoms during the day, they should be sent home immediately.

- (D) The employee should wear a face mask at all times while in the workplace for 14 days after last exposure. Employers can issue facemasks or can approve employees' supplied cloth face coverings in the event of shortages.
  - (E) The employee should maintain at least six feet of distance from other people as work duties permit.
  - (F) Beyond standard cleaning protocol, clean and disinfect all areas such as offices, bathrooms, common areas, and shared electronic equipment routinely known to be impacted by the exposed employee for 14 days after last exposure.
- (4) Nothing in this section limits the operations of first responders, health care institutions, public health functions, pharmacies, and other entities that are involved in the mitigation of risk during this pandemic.
4. Vendors moving between food-selling establishments must frequently clean and disinfect frequent touch points.
  5. If an employee at a food-selling establishment tests positive for COVID-19, the establishment must notify food vendors and other employees of the positive test result as soon as possible and in no case later than 12 hours after receiving the test result, without revealing the personal health-related information of any employee.
  6. Strict compliance with sections 3119, 4109, 4113, and 4115 of the Food Law, 92 PA 2000, as amended, MCL 289.3119, MCL 289.4109, MCL 289.4113, and MCL 289.4115, is temporarily suspended to the extent necessary to extend the deadline for local health departments to submit fees under section 3119, and to extend the license and registration expiration dates under sections 4109 and 4115, until 60 days after the end of the declared states of emergency and disaster. Furthermore, late fees shall not be assessed under sections 4113 or 4115 during the 2020–2021 license year.
  7. Strict compliance with subsection 6137 of the Food Law, MCL 289.6137, is suspended to the extent necessary to make a license holder eligible for a special transitory temporary food unit for the 2020–2021 licensing year, even if the license holder received only 1 evaluation during the 2019–2020 licensing year.
  8. For the purposes of this order, “food-selling establishments” means grocery stores, convenience stores, restaurants that sell groceries or food available for takeout, and any other business that sells food.
  9. Consistent with MCL 10.33 and MCL 30.405(3), a willful violation of this order is a misdemeanor.
  10. This order is effective immediately and continues through May 22, 2020.

Given under my hand and the Great Seal of the State of Michigan.

Date: April 24, 2020

Time: 11:28 am
