

Block 5 New Neighborhood Park

The 2019 Downtown Master Plan specifically calls for the creation of a signature urban park on Block 5 (south of N Street / west of 7th) as a catalyst project

Create a Signature Urban Park

Both the 2005 Downtown Master Plan and the 2015 South Haymarket Neighborhood Plan recommended a public park in The South Haymarket District. This park would provide much needed green space in this dense urban area that continues to infill with new residences and offices. A new park in this location could generally be bounded by the railroad tracks on the west, J Street to the south, S. 7th Street to the east, and N Street to the north.

Two options have been created to explore the design and layout potential for West Park and the surrounding blocks. Park amenities could include a multi-purpose lawn space, small playground equipment, skate park, public market, and dog park.
