LIFE CARE OF ELKHORN NUMBERS UPDATE

On April 27, 2020, we received notification that a resident in our facility had tested positive for the coronavirus. On May 15, 2020, we had our first death. We mourn the loss of our residents. We are deeply saddened that despite our best efforts, this deadly outbreak has reached our building. We have been following all guidelines from both federal and state health authorities. Our staff have been vigilant to practice all necessary procedures of infection control. On May 11, 2020, we did full testing of our residents. We immediately separated all residents who are positive into their own area of the building. We are doing everything we can to provide the best care for residents and to safeguard staff.
