

Hospice Care means peace of mind. Nobody wants to pass on, but we all do at some point. Hospice Care cannot prevent our passing, but they help you and your loved one pass in a way we all hope we will. Peacefully. Hospice played a large role for our life and without them dad/grandpa would not have been able to complete his life in a peaceful manner like he did. Hospice Care put my dad/grandfather out of pain allowing him to keep his independence which improved his quality of life so his last months were more fulfilling for him and our family. They guided us through the difficult journey to ease our hearts and minds, made special efforts to honor dad/grandpa for his military services, and each of them were compassionate, considerate, loving, understanding, and patient through the whole process. Hospice Care is much more than in home medical care. Hospice Care is families taking care of families.
