*

Case No. 15 CV ⁴⁴⁶447

JUDGE REEVE KELSEY

**JUDGMENT ENTRY
RESCUE FACILITY
PERMIT**

Kenneth Hetrick has owned dangerous wild animals ("DWA," R.C. 935.01(C)) at his home for 40 years. He serves on the Wood County Dangerous Wild Animal Response Team. He has never had an animal escape from his property, nor has he experienced a situation where a person was bitten or scratched by one of his DWA. Mr. Hetrick holds a Class C Exhibitor's license granted by the United States Department of Agriculture under the Animal Welfare Act, which he has had since 1989. His license for 2015 was approved after an inspection by the USDA on August 28, 2014. Inspections by the USDA are unannounced and very thorough. Mr. Hetrick was trained in chemical immobilization of animals in 1996 and has anesthetized many animals. Mr. Hetrick has a long-standing relationship with his veterinarian, Dr. Carstensen, who cares for his DWA.

JOURNALIZED

NOV 21 2016

In Muskingum County in 2011, the owner of 56 DWA released all of his animals and committed suicide. As a result of these events, R.C. Chapter 935 was enacted effective September 5, 2012.

There are two components to the Act. First, each DWA must be registered and microchipped. R.C. 935.04. Second, the owner of the DWA must determine whether the owner qualifies as a wildlife shelter, rescue facility, wildlife sanctuary, wildlife propagation facility, or qualifies for one of several exemptions available under the Act.

On October 22, 2012, Mr. Hetrick complied with the registration requirements of R.C. 935.04.

Many owners of DWA opposed this law believing it to be unconstitutional. They challenged the law in federal court. The law was ultimately upheld. *Wilkins v. Daniels*, 744 F.3d 409 (6th Cir.2014). Counsel for the litigants advised the litigants not to seek registration under R.C. Chapter 935 while the litigation was pending. After the Sixth Circuit Court of Appeals decision was filed on March 4, 2014, the litigants considered whether or not to appeal the decision to the United States Supreme Court. They ultimately decided not to.

After the dust had settled on the litigation, Mr. Hetrick decided that he should form a rescue facility. On March 10, 2014, by letter, Candice Miller of the ODA contacted Mr. Hetrick requesting Mr. Hetrick come into compliance with R.C. Chapter 935. Mr. Hetrick expressed frustration in leaving 10 unanswered messages

JOURNALIZED

NOV 21 2016

on Ms. Miller's voicemail requesting information on helping Mr. Hetrick become compliant with the R.C. Chapter 935. Record of Proceedings, Record #12, p. 351-352.

Ultimately he filed his application to obtain a rescue facility permit on October 17, 2014. From filing his application for a rescue facility permit through April, 2015, Mr. Hetrick invested \$35,000 to \$40,000 in bringing his facility into compliance with the ODA regulations. Record of Proceedings, Record #7, p. 230-234, and Record of Proceedings, Record # 12, p. 78.

Mr. Hetrick became concerned for the well-being of his animals after they had been confiscated. In the summer of 2015 the court ordered Timothy A. Reichard, DVM, MS, to evaluate the ODA's Columbus facility. Dr. Reichard was the Director of Animal Health and Nutrition at the Toledo Zoo from 1982 to 2006. He is presently a self-employed veterinarian with a specialty in exotic pets and wildlife. In a report prepared for this court in a related proceeding Dr. Reichard stated:

I recommend the animals be returned to Tiger Ridge [Mr. Hetrick's facility] as soon as possible once the ODA conducts an inspection of the improvements made to the remodeled facility and agrees it meets permit requirements. The DWA holding facility [ODA's facility] provides quality short term housing but lacks an appropriate environment for the long term. The animals have been there for 6 months which is beyond what I consider short term and probably longer than the original

JOURNALIZED

NOV 21 2016

design plans for the facility. It is important to transfer them back ASAP * * *.

* * *

And finally for the well being of the animals, a decision needs to be made quickly on the permanent housing location of these animals. I think Tiger Ridge would be the appropriate permanent location. See Plaintiff's Notice of Filing the Signed Report and Recommendations of Dr. Reichard, DVM filed on August 10, 2015 in *Kenneth Hetrick v. Ohio Department of Agriculture*, Case No. 15 CV 048.

In Dr. Reichard's opinion Mr. Hetick's investment of \$35,000 to \$40,000 in his facility was appropriate.

Mehek Cooke, chief legal counsel for the ODA, on October 31, 2014, acknowledged receipt of Mr. Hetrick's application for a rescue facility permit. She concluded her acknowledgement as follows: "Additionally, the department requests that an on-site visit occur to verify that the facility meets the care and caging standards that were adopted in OAC 901:1-4." Record of Proceedings, Record #52, p. 1058-1059. Mr. Hetrick promptly consented.

Dominic D'Urso, a dangerous wild animal inspector for the ODA, testified that it was his impression that Dr. Melissa Simmerman, Assistant State Veterinarian and Assistant Chief of the ODA Division of Animal Health, viewed Mr.

JOURNALIZED

NOV 21 2016

Hetrick's application as a joke as the ODA would never approve Mr. Hetrick's application. Proceedings before Hearing Examiner Andrew Cooke, May 11, 2015, p. 105-106.

It is not ODA's policy to inspect an applicant's DWA facility prior to the granting of a permit. Record of Proceedings, Record #11, p. 218-219, 227-228. In fact, the ODA's first inspection of many of the wildlife shelters occurred seven to 12 months after the permit had been granted. In cases where violations of ODA's regulations were found, the permit holders were given multiple chances to bring their facilities into compliance. See Appendix A, Inspection of Wildlife Shelters.

Contrary to its policy, ODA decided to inspect Mr. Hetrick's facility. While a typical inspection involves only one or two ODA inspectors, the ODA assembled a team of about six or seven inspectors for Mr. Hetrick's facility. Record of Proceedings, Record #11, p. 191-192; and Proceedings before Hearing Examiner Andrew Cooke, May 11, 2015, p. 100, 108. It was Mr. D'Urso's view that the purpose of the ODA inspection "was to seek out any further evidence that we could use to justify the confiscation of his animals." *Id.* at p. 107, 127-128. Mr. Hetrick cooperated with the representatives from ODA. The inspection was conducted on November 7, 2014.

Mr. D'Urso stated, "the overall psychological stability of the animals was good. Most of them were in good health except for Leo the lion. He was geriatric, later in life. * * * They had good weight. Their fur looked good. Their stool looked good, and they were relatively, I don't want to say personable to anthropomorphize,

JOURNALIZED

NOV 21 2016

but they were – they gave off friendliness.” *Id.* at p. 113-114. Mr. D’Urso noted there were several regulatory violations with respect to the facilities, but none of the violations adversely affected the health and welfare of the animals or posed a threat to neighboring people. *Id.* at p. 113-127. *See* Appendix B, Comparison of Inspection Reports.

As of the November 7, 2014 inspection, according to Dr. Simmerman, the ODA was still considering Mr. Hetrick’s application for a rescue facility permit.

By letter dated January 22, 2015, the ODA proposed to deny Mr. Hetrick’s application for a rescue facility permit. Ms. Cooke stated that the basis of her denial was failure to file the application for a rescue facility permit by January 1, 2014 and “significant safety concerns regarding the construction of your facility and your ability to prevent the escape of your animals.” Record of Proceedings, Record #53.

On January 28, 2015, the ODA arrived at Mr. Hetrick’s facility to confiscate the animals. Mr. Hetrick did not permit the ODA onto his property. ODA then petitioned this court for a warrant to enter upon Mr. Hetrick’s property to seize his DWA. Ron Cordial, head ODA enforcement agent, misrepresented to the court, “But, basically the caging that the animals are in, the conditions that the animals were kept in, some of them were kept together in small cramped areas.” Transcript of the Warrant to Search Proceedings, January 28, 2015, p. 8. *See* Appendix B. Ms. Cooke’s letter of January 22, 2015, never referred to “small cramped areas.” Mr. D’Urso testified that “most of the enclosures were at least twice, if not more times the

JOURNALIZED

NOV 21 2016

minimum required square footage per animal * * *." Proceedings before Hearing Examiner Andrew Cooke, May 11, 2015, p. 114.

Even though Mr. Hetrick registered his DWA, filed a rescue facility application, and permitted the November 7, 2014 ODA inspection, Mr. Cordial again misrepresented to the court, "Mr. Hetrick has not cooperated from day one." Transcript of the Warrant to Search Proceedings, January 28, 2015, p. 9. The warrant was granted. Even though Mr. Hetrick's rescue facility application was pending, the ODA confiscated Mr. Hetrick's animals.

Mr. Hetrick requested a hearing on the proposal, which was held before Hearing Officer Andrew P. Cooke. Hearing Officer Cooke on July 2, 2015, recommended that Mr. Hetrick's application be denied. He based his decision on (1) the untimely filing of the application, and (2) inadequate caging requirements needed for public safety. Exhibit C to Order No.: 2015-300, attached to Mr. Hetrick's Notice of Appeal.

Mr. Hetrick, through counsel, filed objections to Hearing Officer Cooke's findings of fact and conclusions of law. Exhibit E to Order No.: 2015-300, attached to Mr. Hetrick's Notice of Appeal. After a thorough review of Hearing Officer Cooke's report and after careful consideration of all of the evidence before him, David T. Daniels, Director of the Ohio Department of Agriculture, on August 7, 2014, adopted the findings and denied Mr. Hetrick's application for a rescue facility permit. Order No.: 2015-300, attached to Mr. Hetrick's Notice of Appeal.

JOURNALIZED

NOV 21 2016

This action is the appeal of Director Daniels's order dated August 7, 2015, denying Mr. Hetrick's application for a rescue facility permit. In administrative appeals this court must consider the entire administrative record and such additional evidence that this court has admitted. After considering the record and additional evidence, this court must first determine whether the ODA in some meaningful manner considered and appraised all the evidence before it to justify its decision. *State ex rel. Sigler v. Lubrizol Corp.*, 136 Ohio St.3d 298, 2013-Ohio-3686, 995 N.E.2d 204, ¶ 15.

The court must also consider whether the order (1) is supported by reliable, probative, and substantial evidence and (2) is in accordance with law. "Reliable" evidence is dependable; that is, it can be confidently trusted. In order to be reliable, there must be a reasonable probability that the evidence is true. "Probative" evidence is evidence that tends to prove the issue in question; it must be relevant in determining the issue. "Substantial" evidence is evidence with some weight; it must have importance and value. *Our Place, Inc. v. Ohio Liquor Control Comm.*, 63 Ohio St.3d 570, 589 N.E.2d 1303 (1992).

To the extent the ODA's decision is based upon the ODA's construction of a state or federal constitution or statute, this court must undertake review of the construction independently. *Ohio Historical Soc. v. State Emp. Relations Bd.*, 66 Ohio St.3d 466, 613 N.E.2d 591 (1993).

JOURNALIZED

NOV 21 2016

Rescue Facility Permit

A rescue facility is a more limited type of facility than a wildlife shelter. A rescue facility “operates a place of refuge where abused, neglected, unwanted, impounded, abandoned, orphaned, or displaced dangerous wild animals are provided care for their lifetime * * *.” R.C. 935.01(K). The operator of a rescue facility cannot do any of the following: “(1) [s]ell, trade, or barter the animal or the animal's body parts; (2) [u]se the animal in any manner for profit; (3) [b]reed the animal; [or] (4) [a]llow the public the opportunity to come into contact with the animal.” R.C. 935.01(K)(1)-(4).

The operator of a rescue facility must be a “nonprofit organization as described in section 170 of the ‘Internal Revenue Code of 1986’ * * *.” This definition creates some confusion as 26 U.S.C. 170 governs what deductions for income tax purposes individual and corporation taxpayers can take for making charitable contributions. The concept of “nonprofit organization” is not described, defined, or referred to in that section.

R.C. 935.101(A)(1) describes the procedure to be used by a person operating a rescue facility prior to January 1, 2014. R.C. 935.101(B) describes the procedure to be used by a person who wishes to begin operation of a rescue facility in Ohio on or after January 1, 2014.

It appears that once granted, a rescue facility permit is effective indefinitely and does not have to be renewed annually, as is the case for a wildlife shelter permit.

JOURNALIZED
NOV 21 2016

Statutory Construction of R.C. Chapter 935

This court must give due deference to the ODA's resolution of evidentiary conflicts, but the ODA's resolution is not conclusive. *Haj-Hamed v. State Med. Bd. of Ohio*, 10th Dist. Franklin No. 06AP-351, 2007-Ohio-2521, ¶ 16. But in this case, this court is obligated to construe the law on its own to determine whether the ODA's decision is in accordance with the law. *Ohio Historical Soc. v. State Emp. Relations Bd.*, 66 Ohio St.3d 466, 613 N.E.2d 591 (1993).

There is no evidence in the record or otherwise before the court that Mr. Hetrick operated a rescue facility as defined in R.C. 935.01(K) at any time prior to January 1, 2014. Therefore Mr. Hetrick's application was pursuant to R.C. 935.101(A)(2): "A person that wishes to begin operation of a rescue facility in this state on or after January 1, 2014, shall obtain a rescue facility permit under this section not later than sixty days prior to beginning operation." There is absolutely no requirement that a person desiring to operate a rescue facility at any time after January 1, 2014, has to file that person's application prior to January 1, 2014.

After January 1, 2014, Mr. Hetrick did possess registered DWA without a permit.

R.C. 935.99 provides for criminal offenses for various violations of the Act:

(A) Whoever violates division (A), (B), (C), (E), (F), or (G) of section 935.18 of the Revised Code [prohibition on the sale

JOURNALIZED

NOV 21 2016

or auction of animals] is guilty of a misdemeanor of the first degree on a first offense and a felony of the fifth degree on each subsequent offense.

(B) Whoever violates division (D) of section 935.18 of the Revised Code is guilty of a felony of the fifth degree.

(C) Whoever violates division (C) of section 935.29 of the Revised Code [violation of a local ordinance governing DWA] is guilty of a minor misdemeanor. Each day of continued violation constitutes a separate offense.

Nowhere does possession of DWA without a permit constitute a criminal offense.

At any time from January 1, 2014, to March 23, 2015, Director Daniels could have sought to enjoin Mr. Hetrick from possessing his DWA without a permit. R.C. 935.24(A) provides that “[t]he attorney general, upon request of the director of agriculture, shall bring an action for injunction against any person who has violated, is violating, or is threatening to violate this chapter or rules.” This section also provides for the assessment of civil penalties against the violator. Director Daniels did not opt for this course of action.

Director Daniels, immediately after January 1, 2014, shall cause an investigation to be conducted if he has reason to believe that a DWA is possessed by a person who has not been issued an appropriate permit. R.C. 935.20(A)(1). For

JOURNALIZED

NOV 21 2016

purposes of the investigation, Director Daniels *may* order the transfer of the animals to another facility. R.C. 935.20(A). There is nothing in the administrative record indicating when Director Daniels commenced the ODA's investigation of Mr. Hetrick's possession of DWA. But, pursuant to Director Daniels's investigation, the ODA confiscated Mr. Hetrick's animals on January 28, 2015, without notice.

The court finds there is no statutory authority for the proposition that a person who possessed registered DWA in Ohio on January 1, 2014, is barred from applying for and receiving a rescue facility permit at any time thereafter.

The second basis for denying Mr. Hetrick's application for a rescue facility was Mr. Hetrick's failure to comply with caging requirements needed for public safety. This basis is also misplaced. R.C. 935.101(D) provides: "A person that *has been issued* a rescue facility permit under this section *shall comply* with the requirements regarding the care and housing of dangerous wild animals established in rules adopted under division (G) of section 935.17 of the Revised Code." (Emphasis added.) The statute clearly contemplates the issuance of a rescue facility permit followed by inspections to insure compliance with caging and care regulations. This is consistent with the ODA's stated policy and its practice. See Appendix A, Inspection of Wildlife Shelters.

The court finds there is nothing in R.C. Chapter 935 barring a person from applying for a rescue facility permit at any time. Any such application must be decided on the merits by the ODA. The court further finds there is nothing in R.C.

JOURNALIZED

NOV 21 2016

Chapter 935 permitting the ODA to deny a rescue facility permit for failing, initially, to meet proper caging and care requirements.

Due Process and Equal Protection

Assuming that R.C. Chapter 935 gives the ODA the discretion to deny a rescue facility permit to a person who owned DWA on October 1, 2013, failed to apply for a rescue facility permit before January 1, 2014, and subsequently filed a complete application for a rescue facility permit, the issue is then whether the ODA's denial of Mr. Hetrick's application and the attendant confiscation of his animals deprived Mr. Hetrick of due process and equal protection of the law.

A statute, while constitutional on its face can, as applied to a particular set of facts, be unconstitutional. *Ruble v. Ream*, Fourth Dist. Washington No. 03CA14, 2003–Ohio–5969, ¶ 17, citing *Belden v. Union Cent. Life Ins. Co.*, 143 Ohio St. 329, 55 N.E.2d 629 (1944), paragraph four of the syllabus. “A statute may be unconstitutional as applied if the government selectively enforces it in violation of equal protection rights.” *State v. Sturbois*, Fourth Dist. Athens No. 09CA12 & 09CA13, 2010–Ohio–2492, ¶ 23. In *Yick Wo v. Hopkins*, 118 U.S. 356, 373–374, 6 S.Ct. 1064, 30 L.Ed. 220 (1886), the Supreme Court explained:

[t]hough the law itself be fair on its face, and impartial in appearance, yet, if it is applied and administered by public authority with an evil eye and an unequal hand, so as practically to make unjust and illegal discriminations

JOURNALIZED

NOV 21 2016

between persons in similar circumstances, material to their rights, the denial of equal justice is still within the prohibition of the constitution.

Some element of purposeful or intentional discrimination must be shown. *Snowden v. Hughes*, 321 U.S. 1, 8-9, 64 S.Ct. 397, 88 L.Ed. 497 (1944).

State laws must be applicable to all persons under like circumstances and not subject people to an arbitrary exercise of power. *Conley v. Shearer*, 64 Ohio St.3d 284, 288, 595 N.E.2d 862 (1992). *And see Fagan v. Boggs*, Fourth Dist. Washington No. 10CA17, 2011-Ohio-5884, ¶ 21-24.

This court finds that all persons under like circumstances are all Ohioans who owned DWA on October 1, 2013, and applied for either rescue facility or wildlife shelter permits in order to retain possession of their animals. The court also finds that Ohioans who own DWA have a protected property interest in their animals. *State v. Cowen*, 103 Ohio St.3d 144, 2004-Ohio-4777, 814 N.E.2d 846, ¶ 9.

First, the ODA granted some permit applications filed after January 1, 2014, but denied Mr. Hetrick's. *See* Appendix C, Consideration of Late Wildlife Shelter Permit Applicants. The ODA stated in February 2014 that it was trying to work with all owners of DWA to get them in compliance with the law. Record of Proceedings, Record #36, p. 876-878. As late as October 17, 2014, the ODA is on record as being committed to working with Ohio's DWA owners to bring them into compliance with the law. Record of Proceedings, Record #28, p. 848-850.

JOURNALIZED

NOV 21 2016

Second, the ODA made several material misrepresentations to this court on January 28, 2014, when it sought the warrant to search Mr. Hetrick's facility. The ODA represented to this court that Mr. Hetrick kept his animals in small, cramped areas when they were in cages at least twice the required square footage. *See* Transcript of the Warrant to Search Proceedings, January 28, 2015, p. 8; and Appendix B. The ODA represented to this court that Mr. Hetrick had not cooperated "from day one" when he had registered his animals, filed for the rescue facility permit, and permitted the ODA to inspect his facility and animals on November 7, 2014. *See* Transcript of the Warrant to Search Proceedings, January 28, 2015, p. 9.

The ODA materially distorted the findings from its November 7, 2014 inspection. "Fresh water available to the animals" became "green-colored with debris present." Fresh-smelling meat became meat with a "pungent odor" indicating it was "spoiled." Some easy fixes to bring Mr. Hetrick's facility into regulatory compliance became "significant safety concerns regarding the construction of [the] facility and [the] ability to prevent the escape of [the] animals." *See* Appendix B.

The whole process by which the ODA evaluated Mr. Hetrick's application was very disingenuous. As of October 17, 2014, the ODA was on record as being committed to working with Ohio's DWA owners. If the ODA knew it was going to deny Mr. Hetrick's application as a matter of law, why didn't the ODA do so when the application was filed? In good faith Mr. Hetrick consented to the November 7, 2014 inspection that the ODA represented to him was part of the application process. That inspection was, in reality, a scouting expedition so the ODA could be

JOURNALIZED

NOV 21 2016

prepared to seize and confiscate Mr. Hetrick's animals on January 28, 2015. If the ODA was in good faith evaluating Mr. Hetrick's rescue facility application, why did it confiscate his animals prior to Director Daniel's final decision on August 14, 2014?

From one ODA employee's observation, Dr. Simmerman never intended to give Mr. Hetrick a chance. She treated his rescue facility application as a joke and never intended to give it a fair review. Proceedings before Hearing Examiner Andrew Cooke, May 11, 2015, p. 105-106.

It is beyond cavil that the ODA worked hand-in-hand with most DWA owners to help them obtain wildlife shelter permits and bring their animal holding facilities up to code. Several wildlife shelter permits were granted after the December 31, 2013 deadline. Many animal holding facilities were not in compliance with regulations for up to a year or longer after their wildlife shelter permits had been granted. But the ODA looked at Mr. Hetrick with "an evil eye and an unequal hand."

The court finds that ODA purposefully and intentionally discriminated against Mr. Hetrick when it denied his rescue facility permit application.

This court has considered the entire record in this case and the additional evidence admitted before the court.

IT IS ORDERED that the order of David T. Daniels, Director of the Ohio Department of Agriculture, dated August 7, 2015, denying Appellant Kenneth Hetrick's rescue facility permit is vacated.

JOURNALIZED

NOV 21 2016

IT IS ORDERED that David T. Daniels, Director of the Ohio Department of Agriculture, shall issue Appellant Kenneth Hetrick a rescue facility permit.

IT IS ORDERED that David T. Daniels, Director of the Ohio Department of Agriculture, shall return all of Appellant Kenneth Hetrick's dangerous wild animals to Appellant before 5:00 p.m. on Tuesday, November 29, 2016.

IT IS ORDERED that the Ohio Department of Agriculture is responsible for all costs incurred in the care, confinement, and transportation of Appellant Kenneth Hetrick's dangerous wild animals from January 28, 2015, until the date they are returned to Mr. Hetrick's possession.

Cost of this action are charged to the appellee.

Payment for court costs

NOV 21 2016

Cinda Bame	New Applicant: Wildlife Shelter Permit	second re-inspection unknown. Filed December 30, 2013; permit granted February 14, 2014; attempted inspection September 17, 2014; re-inspection November 19, 2014 (violations found); re-inspection violations found; subsequent re-inspection unknown.	Primary enclosure is constructed of chain link fencing smaller than 12 gauge. The height of the secondary enclosure is less than eight feet in some places. The primary enclosure's area is considerably less than six hundred square feet.	Proceedings before this Court, February 4, 2016, p. 46-50; Exhibit VV2.
Teresa Bullock	New Applicant: Wildlife Shelter Permit	Filed December 16, 2013; permit granted March 27, 2014; routine inspection October 6, 2014 (violations found); re-inspection November 7, 2014 ("All previous violations have been corrected. No violations remain.")	Locking mechanism on chute from primary enclosure to enrichment area is not of suitable strength.	Proceedings before this Court, February 4, 2016, p. 50-51; Exhibit VV4.
Amy Workman	New Applicant: Wildlife Shelter Permit	Filed January 6, 2014; permit granted April 4, 2014; routine inspection September 18, 2014 (violations found); re-inspection November 3, 2014 (violations found); re-inspection November 18, 2014 ("All previous violations have been corrected. No violations remain.")	Exposed fiberglass insulation in the primary enclosure causes a potential safety hazard to the DWA contained within. Window coverings in primary enclosure are not equivalent in strength / security to 9 gauge wire mesh.	Proceedings before this Court, February 4, 2016, p. 51-53; Exhibit VV5.

APPENDIX B **COMPARISON OF INSPECTION REPORTS**

<p>Letter from Mehek M. Cooke, Chief Legal Counsel for the ODA, January 22, 2015, proposing to deny Mr. Hetrick's application for a rescue facility permit. Exhibit A to the Notice of Appeal in 2015 CV 446.</p>	<p>Testimony of Dominic D'Urso, ODA's dangerous wild animal inspector. Proceedings before Hearing Examiner Andrew Cooke, May 11, 2015</p>
<p>"[T]he Department has significant safety concerns regarding the construction of your facility and your ability to prevent the escape of your animals."</p> <p>Multiple cages were observed to have chains and padlocks disengaged/unlocked.</p> <p>The chain link fencing on all but two enclosures is secured on the outside of the fence posts instead of inside the posts.</p> <p>"The hinge pins on many of the gates were installed in the same direction allowing for the gates to be lifted easily * * *"</p> <p>Tigers could stand on top of housing units and jump out of cages.</p> <p>The enclosure with a black leopard and a tiger does not have a full primary fence, a full secondary fence, a security entrance, or a roof. Cantilever fencing was not continuous, not completely electrified, and not at a 45 degree angle.</p> <p>All secondary enclosures were located four feet or closer to the nearest primary enclosure.</p>	<p>"Most of the enclosures were at least twice, if not more times the minimum required square footage per animal, but some of them had inadequacies such as no roof or the chain link fencing would be on the wrong side of the post, such as things like that. * * * Those are relatively easy fixes. Switching the chain link to the other side of the post is time consuming but not that difficult, really." Proceedings before Hearing Examiner Andrew Cooke, May 11, 2015, p. 114-115.</p> <p>"I noted that some of the enclosures did not have man-made installed artificial barriers, but I did not mark that non-compliant because it says, 'includes a dig barrier unless the floor of the primary enclosure is concrete, bedrock or another impervious material appropriate for the animal in the enclosure.' And considering there was a lot of exposed bedrock and there was no evidence of any animals digging through that bedrock, I did not mark them non-compliant for that, but I noted there was not an artificial barrier." <i>Id.</i> at p. 115.</p> <p>"I did note that there was some exposed sheet-metal edges on some of the dens for the animals, which just coming from my zoo experience, we try to I guess</p>

JOURNALIZED

The department was unable to verify if the primary enclosures had dig barriers present.

The bobcat enclosure did not contain a shift cage.

kind of make our enclosures somewhat like padded rooms, you know, try not to allow them ever get hurt on anything, but I didn't see any wounds on any animals from such edges, but I did note it. * * * It's an easy fix * * *." *Id.* at p. 116.

"I noted that some of the secondary enclosures were less than eight feet away from the primary enclosures. * * * It was not a safety concern to me but it was a concern with what the way it fell in regards to the code. * * * [T]hey were the right height, they were just closer than recommended by our law. * * * [The reason for the secondary enclosure is] [t]o act as a second barrier in case there were ever an escape of an animal and also to protect the animal from the public and the public from their own curiosity." *Id.* at p. 117.

"* * * I noted that the single male tiger Obey by himself had over four times the minimum square footage for the enclosure. I noted that that same tiger, Obey's enclosure was strong enough but the tiger could potentially jump from the top of the shelter to reach the top of the cage. * * * That's an easy fix." *Id.* at p. 118.

"I marked that some of the cantilever fencing was 45 degrees at some points, which is what the law requires, but at some points it was also vertical, so there was an issue with the cantilever fencing not actually meeting up to the way I interpreted the regulations. * * * It is definitely fixable, yeah. I did mark that one animal did not have a shift cage, but I believe that animal was not required to have one anyway. I marked

JOURNALIZED

	<p>that the cantilever fencing on the enclosure up against the house that included a tiger and a leopard, I marked that the cantilever fencing was not continuous, not completely electrified, and not at the correct angle from the vertical." <i>Id.</i> at p. 124-125.</p> <p>These items could be fixed.</p>
<p>"The water receptacles had obvious green-colored water with debris present."</p>	<p>"I noted there was some muddy standing water, which would kind of coincide with the type of year it was and the fact that there was very minimal draining due to the bedrock underneath. I did note that some of the animals, their water buckets had some grime built up on the inside of the bucket but the water looked fresh and I marked that the water was green and dirty in their enrichment pools, but I don't consider that a primary water receptacle since it's enrichment and there was fresh water available to the animals." <i>Id.</i> at p. 118-119.</p>
<p>"Meat provided to the animals during the visit which was pulled directly from the refrigeration unit had an obvious pungent odor present indicating it was spoiled."</p>	<p>"I remember seeing a lot of horse meat in there in five-gallon buckets. * * * It had an odor. It smelled like meat. Yes, it smelled like meat. It smelled like a butcher shop. * * * It did not smell spoiled." <i>Id.</i> at p. 112-113.</p>
<p>"The roofs of the shelters in many cages consisted of tin sheets with exposed sharp edges which could cause harm to animals brushing up against them."</p> <p>"There were also electrical outlets and cords connected to the enclosures in such a way that the animals within could pull the cords out and harm themselves."</p>	<p>"Once again, I noted exposed edges of sheet-metal on a shelter roof." <i>Id.</i> at p. 118.</p>

JOURNALIZED

The male lion, "Leo," was observed to be ataxic. This condition is possibly due to medical or nutritional problems.

"I noted that the overall psychological stability of the animals was good. Most of them were in good health except for Leo the lion. He was geriatric, later in life. He had hock sores and sores on his hips * * *." *Id.* at p. 113-114.

APPENDIX C
CONSIDERATION OF LATE WILDLIFE SHELTER PERMIT APPLICANTS

Barbara Ann Korn	New Applicant: Wildlife Shelter Permit	Filed March 30, 2014; application supplemented April 14, 2014; permit granted June 19, 2014; routine inspection September 19, 2014.	Record of Proceedings, Record #7, p. 184-185; Record of Proceedings, Record #22, p. 772-792.
Robert M. Beals	Applicant: Wildlife Shelter Permit	Filed March 29, 2014; permit granted June 20, 2014; routine inspection September 26, 2014 (violations found); re-inspection October 30, 2014 ("All previous violations have been corrected.")	Record of Proceedings, Record #7, p. 185-186; Record of Proceedings, Record #22, p. 793-808.
Pamela J. White	New Applicant: Wildlife Shelter Permit	Filed April 7, 2014; permit granted April 18, 2014; routine inspection September 23, 2014 (violations found); re-inspection October 7, 2014 ("All previous violations have been corrected. No violations found.")	Record of Proceedings, Record #7, p. 186-187; Record of Proceedings, Record #22, p. 809-829.
Michael Stapleton	New Applicant: Wildlife Shelter Permit	Filed March 21, 2014; found to be incomplete and returned April 22, 2015.	Record of Proceedings, Record #7, p. 170-174; Record of Proceedings, Record #37, p. 879-880.
